Q6)

Question:

DS	Session	Searching	Question Information	Level 1	Challenge 6
Problem Description: Kanna is upset to learn that no one at his school recognises his first name. Even his friends refer to him by his surname. Frustrated, he decides to make his fellow college students know his first name by forcing them to solve this question. The task is determining the third greatest number in the supplied array. Constraints: $0 < n < 100$ $0 < arr < 1000$ Input Format: first line represents the number of elements N to be get second line indicates input elements according to N Output Format: Single line represents the out put that is third largest number.					

PROGRAM:

```
1  #include <stdio.h>
2
3  int main() {
4      int n,a[100],i,j,t;
5
6      scanf("%d",&n);
7
8      for(i=0;i<n;i++)
9          scanf("%d",&a[i]);
10
11     for(i=0;i<n-1;i++)
12         for(j=i+1;j<n;j++)
13             if(a[i]<a[j]) {
14                 t=a[i];
15                 a[i]=a[j];
16                 a[j]=t;
17             }
18
19     printf("The third Largest element is %d\n",a[2]);
20
21     return 0;
22 }
```

OUTPUT:

TEST CASE 1:

```
6
1 14 2 16 10 20
The third Largest element is 14
```

TEST CASE 2:

```
7
19 -10 20 14 2 16 10
The third Largest element is 16
```
