| <p>Problem Description:</p> <p>Good news! Suresh get to go to America on a class trip! Bad news, he don't know how to use the Dollar which is the name of the American cash system. America uses coins for cash a lot more than the Kuwait does. Dollar comes in coins for values of: 1, 2, 10, 50, 100, &amp; 500 To practice your Dollar skills, suresh have selected random items from Amazon.co.us and put them into a list along with their prices in Dollar. Suresh now want to create a program to check suresh Dollar math.</p> <p>Suresh goal is to maximize your buying power to buy AS MANY items as you can with your available Dollar.</p> <p>Input Format:</p> <p>File listing 2 to 6 items in the format of:</p> <p>ITEM DDDDD</p> <p>ITEM = the name of the item you want to buy</p> <p>DDDDD = the price of the item (in Dollar)</p> <p>Output Format:</p> <p>Print the output in a separate lines contains, List the items suresh can afford to buy. Each item on its own line. Suresh goal is to buy as many items as possible. If suresh can only afford the one expensive item, or 2 less expensive items on a list, but not all three, then list the less expensive items as affordable. If suresh cannot afford anything in the list, output "I need more Dollar!" after the items. The final line you output should be the remaining Dollar he will have left over after make purchases.</p> |         |        |                      |         |              |

## PROGRAM:

```
1  #include <stdio.h>
2
3  int main() {
4      int dollar, n;
5      char item[6][50];
6      int price[6];
7      int bought = 0;
8
9      scanf("%d %d", &dollar, &n);
10
11     for (int i = 0; i < n; i++) {
12         scanf("%s %d", item[i], &price[i]);
13     }
14
15     for (int i = 0; i < n; i++) {
16         if (dollar >= price[i]) {
17             printf("I can afford %s\n", item[i]);
18             dollar = dollar - price[i];
19             bought = 1;
20         } else {
21             printf("I can't afford %s\n", item[i]);
22         }
23     }
24
25     if (bought == 0) {
26         printf("I need more Dollar!\n");
27     } else {
28         printf("%d\n", dollar);
29     }
30
31     return 0;
32 }
```

## OUTPUT:

### TEST CASE 1:

```
6000 3
Phone-case 1486
Candybar 863
Sunglasses 5529
I can afford Phone-case
I can afford Candybar
I can't afford Sunglasses
3651
```

### TEST CASE 2:

```
2100 3
Camera 69555
TV 76439
iPhone 90000
I can't afford Camera
I can't afford TV
I can't afford iPhone
I need more Dollar!
```
